A great learner at Robina State School

A Good Reader
I am a good reader if I understand what I read, decode texts accurately and fluently and know the meaning of words. To become a good comprehender I need to have a clear purpose for reading and be able to think actively as I read.

A Good Speller
I am a good speller if I do more than just memorise the spelling of individual words, I need to learn to use the four spelling knowledges:
1. Visual – recognise the visual features of words
2. Morphemic – understand the parts of words such as affixes and root words
3. Phonological – understand the relationships between sounds and letters
4. Etymological – know about the origin of words

A Good Mathematician
I am a good mathematician if I understand our decimal number system, can fluently recall number facts and use what I know to solve problems.

An Effective Learner
I will become an effective learner by adopting the five keys to learning success:
- Organisation
- Getting Along
- Confidence
- Persistence
- Resilience.

These five keys help me to do the hard work that is needed to be able to show that I know and can do the things expected of me in my learning.

Make Every Day Count
I need to make every day count by being at school on time ready for learning. I am only away if the doctors says I am sick and need to stay at home to get better.
